How to use

Stick one marker on each face of a cube with faces of 6.5 cm or more. Any face, any way up, roughly centred.

Turn the cube slowly in view for 20-30 s so the app learns where each marker is.

For a ready-made cube, use the matching cube net sheet instead: it tracks straight away.

This line must measure exactly 10 cm. If it doesn't, reprint at 100% / Actual size.
