How to use

1. Stick one marker on each face of the small cube. Any face, any way up, roughly centred.

   Each cut marker is 5.6 cm, so it covers a 4x4 Rubik's cube face (about 6 cm).

2. Start the app and turn the cube slowly in view, about 30-40 cm from your eyes, for 20-30 s.

3. The orange cube in Stage 1 then follows the real cube. Move it into the green zone.

   The app remembers the layout. Markers 0-5 (the 7 cm sheet) are for the larger Stage 2 prop.

This line must measure exactly 10 cm. If it doesn't, reprint at 100% / Actual size.
